

INDUSTRY BUZZ

Effaclar MAT

La Roche-Posay Laboratoire Dermatologique launches Effaclar MAT, a dual-action daily mattifying and pore-refining moisturizer designed to target the effects of hyper-seborrhea. Effaclar MAT acts at the source to help clear sebum-clogged pores and prevent glands from secreting excess sebum with a transformative blend of ingredients including sebulyse to mattify and refine pores, lipohydroxy acid to smoothe the skin's texture, and zinc pidolate to neutralize shine. The antioxidant effects of vitamins C and E also help protect the skin against external aggressors. For more information, visit www.laroche-posay.us.

Replenix MD Perfect 10 Peel

Topix Pharmaceuticals, Inc, introduces Replenix MD Perfect 10 Peel (referred to as The Peel) to visibly reduce the signs of aging with 1 peel session. The Peel contains a synergistic blend of ingredients to promote noticeable improvement in the appearance of dull and uneven skin tone and texture, fine lines and wrinkles, dark spots, sun damage, discolorations, large pores, and roughness. It works from the inside out to encourage cell stimulation, support collagen production, and strengthen the skin's protective barrier to promote more youthful and healthier-looking skin. The first step contains a rich blend of acids to maximize exfoliation and gentle peeling; the second step features an all-*trans*-retinol complex to enhance and augment the effects of this treatment. The hallmark of The Peel is that it provides actual visible peeling. It is available in intermediate (for more sensitive skin) and advanced (for more tolerant skin) strengths. For more information, visit www.topixpharm.com.

Xeomin

Merz Aesthetics, Inc, announces the nationwide availability of Xeomin (incobotulinumtoxinA). Xeomin is approved by the US Food and Drug Administration for temporary improvement in the appearance of moderate to severe glabellar lines in adult patients. The product acts on nerve endings in muscles to prevent muscle fibers from contracting; by reducing these contractions, Xeomin can temporarily reduce the appearance of frown lines on the forehead. For more information, visit www.xeominaesthetic.com. ■

Invited Faculty include: Kimberly Butterwick, MD; Jeanine Downie, MD; Steven Fagien, MD; Patricia K. Farris, MD; Julius Few, MD; Roy Geronemus, MD; Timothy Greco, MD; George Hruza, MD; José Raúl Montes Pagán, MD (*Course Co-Director*); Wendy Roberts, MD; David Sarwer, PhD; Ava Shamban, MD; Jonathan Sykes, MD (*Course Co-Director*); Woffles Wu, MD
